2019 Spring Pool Opening Contract

Our Technicians are certified Pesticide Applicators and Pool operators.

Summerization

Opening includes: Cover removal (if selected), re-assembly/start-up of equipment and delivery of spring "Early Buy" chemical order. We will remove plugs and gizmos and, if the pool is full, put the pool equipment into operation. We will test your pool water for chemical balance and will, if requested, add any necessary chemicals. We will examine equipment for proper operation and (if possible) test heater(s) for proper ignition and shut off. Please remember to remove any excess water from your cover to avoid additional charges. Make sure your winter overflow line is plugged (if applicable) and pool is filled before we arrive. We will need access to electric, and a source of water, as well as all supplies at poolside. Please be aware that if we cannot see the bottom, we will be unable to vacuum. Please call to set up another appointment if you want Pool Pro to return to vacuum your pool. Please fill in all needed information and mail, fax or call our office.

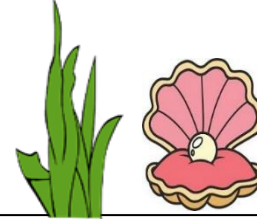

-Pool Pro
